Finding Your Sears Craftsman Lawn

Mower Manual

The first hurdle is locating your specific Craftsman lawn mower manual. Several avenues exist, depending on the age and model of your mower. Many older Sears manuals, particularly for popular models, can be found through online resources. This often involves searching for the model number, usually located on a sticker under the mower deck or on the engine itself. Keywords like "Craftsman lawn mower manual download," "Sears Craftsman repair manual PDF," and even more specific searches like "Craftsman 917.27XXX series manual" (replacing XXX with the specific numbers) can be highly effective.

Where to Search:

- **Sears PartsDirect Website:** While Sears stores are largely gone, their parts website often provides access to manuals. Use the model number to find relevant documentation. This is a valuable resource for current and recently discontinued models.
- **Online Forums and Communities:** Online communities dedicated to lawn care and repair often have users who share and upload manuals. Sites like Reddit and various lawn care forums can be surprisingly helpful.
- **eBay and Other Auction Sites:** Sometimes, individuals sell original printed manuals on auction sites. This can be a good option if you prefer a

physical copy.

- **ManualsLib.com:** This website is a vast repository of user-uploaded manuals, including many for older Craftsman mowers. Again, your model number is crucial for successful searching.
